thinking he's a super star

with the many books she always is cartin'

The Log Home is Back.

The log home stays cool in summer, warm in winter—naturally. It has for centuries. That's why the Rocky Mountain Log Home may be the answer to modern day construction problems.

This log home with the "Swedish Cope" construction method is quickly and easily constructed and requires little maintenance in years to come.

It's simple—and that's what builds you a better home.

Steve,
Since ya wanted me to write some thing slightly intelligent here it goes. This is really unusual! You've had a very good time with. Even though you and Dan drive me nuts with your Spider-hand I still like ya. Don't party to much. Stay cool.

Hi Steve,
Do you know who the craziest person I know is? You. But that that is good. Just think how boring school would be without you.
You always bring up something very thought-provoking in class. How ~~&~~ close does a fly get to the ceiling before it turns over? Does a tree falling over by no living thing make any noise?
Have fun in the future. "81"
